

## CLAIMS

What is claimed is:

- 1        1.     A cell-phone retractable earpiece comprising:  
2                a phone-wire reel in a reel pocket on a cell phone that is attachable to  
3 a cell-phone user;  
4                phone wire in phone-electrical communication with the cell phone  
5 proximate a reel end of the phone wire that is attached to a reel axle onto which the  
6 phone wire is windable;  
7                the reel axle being wind-tensioned to wind the phone wire onto the  
8 phone-wire reel in opposition to pulling the phone wire and locking the reel axle in  
9 a selectively unwound mode;  
10               an ear hook containing an ear-hook portion of the phone wire;  
11               the ear hook having an ear rest on a top of a user ear, an ear-aft  
12 curvature and a hook bottom proximate a bottom of the user ear;  
13               an ear-size adjuster containing an adjuster portion of the phone wire and  
14 having adjustability of length of the ear-size adjuster intermediate the top of the ear  
15 and an ear cavity of the user's ear;  
16               a sound reproducer on a bottom of the ear-size adjuster proximate the  
17 ear cavity;  
18               a sound conveyor in sound communication intermediate the sound  
19 reproducer and a predetermined position in the ear cavity; and  
20               a microphone on a microphone extension in phone-sound  
21 communication with the phone wire proximate a user's mouth.

1           **2.**     The cell-phone retractable earpiece of claim **1** wherein:  
2                     the sound reproducer includes a miniature conical horn that circles an  
3 entrance to an inner portion of the user ear.

1           **3.**     The cell-phone retractable earpiece of claim **1** wherein:  
2                     the sound reproducer includes a tubular member that is extended  
3 predeterminedly towards an inner portion of the user ear.

1           **4.**     The cell-phone retractable earpiece of claim **1** wherein:  
2                     the ear hook includes an ear clamp having a first clamp jaw attached to  
3 the ear hook and a second clamp jaw with an ear-grasp member attached to the  
4 sound reproducer.

1           **5.**     The cell-phone retractable earpiece of claim **4** wherein:  
2                     the microphone is extended from the phone wire proximate the sound  
3 reproducer to proximate the mouth of the cell-phone user.

1           **6.**     The cell-phone retractable earpiece of claim **4** wherein:  
2                     the microphone is extended from the phone wire at proximate a bottom  
3 of the ear hook to proximate the mouth of the cell-phone user.

1           **7.**     The cell-phone retractable earpiece of claim **1** wherein:  
2                     the microphone is extended from the phone wire proximate the sound  
3 reproducer to proximate the mouth of the cell-phone user.

1           **8.**     The cell-phone retractable earpiece of claim **1** wherein:  
2                 the microphone is on a retractable appendage for selectively retractable  
3 positioning of the microphone intermediate the phone wire and the user's mouth.

1           **9.**     The cell-phone retractable earpiece of claim **4** wherein:  
2                 the microphone is on a retractable appendage for selectively retractable  
3 positioning of the microphone intermediate the phone wire and the user's mouth.

1           **10**    The cell-phone retractable earpiece of claim **1** wherein:  
2                 the reel axle is wind-tensioned with an electrical motor.

1           **11.**   The cell-phone retractable earpiece of claim **1** wherein:  
2                 the reel axle is wind-tensioned with a mechanical spring.

1           **12.**   The cell-phone retractable earpiece of claim **1** wherein:  
2                 the phone-wire reel is locked in the selectively unwound mode with a  
3 winding lock.

1           **13.**   The cell-phone retractable earpiece of claim **12** wherein:  
2                 the winding lock includes a phone-wire clamp.

1           **14.**   The cell-phone retractable earpiece of claim **12** wherein:  
2                   the winding lock includes an un-locker that unlocks the winding lock  
3   with an unlock communication to the winding lock.

1           **15.**   The cell-phone retractable earpiece of claim **14** wherein:  
2                   the unlock communication includes a double jerk of the phone wire.

1           **16.**   The cell-phone retractable earpiece of claim **14** wherein:  
2                   the unlock communication includes a predetermined touching of the reel  
3   pocket.

1           **17.**   The cell-phone retractable earpiece of claim **1** wherein:  
2                   the phone wire has a length of approximately three feet.

1           **18.**   The cell-phone retractable earpiece of claim **1** wherein:  
2                   the phone wire is standard phone wire that is used commonly  
3   intermediate a phone jack and a telephone handset.

1           **19.**   The cell-phone retractable earpiece of claim **1** wherein:  
2                   the phone wire is customized phone wire having an insulated outside  
3   perimeter that is circumferential with a diameter of approximately two millimeters  
4   and contains all standard phone-wire lines with predeterminedly thin insulation on  
5   the phone-wire lines.

1        **20.**    The cell-phone retractable earpiece of claim 1 wherein:  
2                the reel pocket has a thickness of approximately one-quarter inch, a  
3 width no greater than a width of the cell phone and a length no greater than a length  
4 of the cell phone.
